
IMMEDIATE START OPPORTUNITY

AS HEAD OF RESEARCH AND DEVELOPMENT

(CANDIDATES WITH PhD DEGREES)

DO YOU WANT TO DEVELOP YOUR PROFESSIONAL CAREER AT ECOMEMB?

Ecomemb is the first European company specializing in the **regeneration of reverse osmosis membranes for reuse** in the same processes for which they were designed.

We are committed to becoming the global leader in sustainable membrane management. **You can be part of the change!**

Position

Head of research and development.

Job description

You will be responsible for conducting **research** on projects focused on the **circular economy** to improve the company's production processes in terms of **sustainability**, contributing to the development of **innovative solutions** within the framework of reverse osmosis membrane regeneration. Specifically, initially you will participate in the development and justification of SNEO-20251171 - NEOTEC project, with a two-year implementation period. You will also be involved in drafting new research proposals, implementing quality and management tools.

You will collaborate with multidisciplinary, enthusiastic, and highly motivated teams with strong technical skills and in-depth knowledge of the water treatment market. You will have the unique experience of contributing to the development and success of Ecomemb, a spin-off of the University of Girona and ICRA.

This is a **full-time position** and will be carried out in a hybrid format at our production center located in the province of Girona, with flexible hours (Monday to Friday) and a good working environment.

Requirements

- Have the PhD degree related to membrane technology or water treatment before 01/03/2026.
- Incorporation: between March 1st and March 29, 2026.
- The following aspects are considered positive:
 - Experience in water treatment and specifically with reverse osmosis membranes in semi-industrial pilot plants (handling industry standard membranes 1 m long, 20 cm diameter, 15 kg weight).
 - Experience in the execution and justification of research projects and/or experience in a private company in the water sector.
 - Demonstrate proficiency in data analysis, research methodologies, and academic writing to present results in an organized, simple, and professional manner.
 - Ability to work in a team, organizational skills focused on meeting deadlines, and good communication skills.
 - Be motivated to be part of the team for a long period of time.
 - Ability to communicate fluently in Spanish and Catalan. Knowledge of other languages is a plus.

Type of contract

Indefinite contract with probationary period.

Salary

It will be detailed in the interview.
